Nouveaux elemens de geographie (par) M. de Lagny de l'Academie royale des sciences, pour mesdemoiselles de Pont-chartrain

1727

MssCol 1682

Summary

Creator: Lagny, Thomas Fantet de, 1660-1734

Title: Nouveaux elemens de geographie (par) M. de Lagny de l'Academie royale des sciences, pour mesdemoiselles de Pont-chartrain

Date: 1727

Size: .21 linear feet (1 volume)

Abstract: This instructive manuscript concerning geography and mathematics was created by Thomas Fantet de Lagny of the French Academy of Sciences for the daughters of the Comte de Pontchartrain, whose seal is on the cover. It is in French and believed to have been written in 1727. The binder's title is "Trait de la sphere," and the volume is illustrated with tables and diagrams. Sections include: "Elemens metaphisiques de la science des nombres" and "Methode nouvelle pour la division."

Access: Advance notice required.
