Pforzheimer Collection

The Carl H. Pforzheimer Collection of Shelley and His Circle is one of the world's leading repositories for the study of British Romanticism. Comprising over 20,000 items, the collection is conceptually centered on the life and works of the poet Percy Bysshe Shelley and his friends, relatives, and contemporaries. Formerly a part of the much larger and now dispersed Pforzheimer Library, the Pforzheimer Collection came to The New York Public Library in 1986.

Related materials

In addition to manuscripts in the hand of Samuel Rogers, the Pforzheimer Collection also holds a handful of manuscript letters addressed to him. A number of early editions of his published works are also held, including a presentation copy of the 1844 edition of his *Italy, a Poem*, inscribed to Mary Shelley. A number of engraved portraits of Rogers are available, as well as a salt print photograph portrait.

Additional Samuel Rogers manuscript material can be found in the Library's Berg Collection and the Manuscripts and Archives Division.
