Photographs of the Metropolitan Opera by Harry G. Schumer

JPB 92-70

Preface

Schumer was Orchestra Librarian for the Metropolitan Opera from 1938 to 1968. He took many photographs during his tenure, the majority of which are informal, backstage portraits of artists in costume taken from approximately 1945-1965. Some sight-seeing slides taken on tour are also included.

Each entry in the catalogue is broken into several parts: call number, subject, production, location, date and identifier.

Call numbers are broken into two parts in the Slide section: Roman Numerals refer to carousel numbers and Arabic Numerals refer to the slide position in each carousel. Color transparencies and Negatives are numbered in fixed order. Negatives have a prefix of "B" or "C" depending on their size, and are kept in the Negative File.

Subjects are primarily artists in costume, unless otherwise noted in the production or identifier field. No roles were identified, and since some artists worked both as chorus and in small roles, it was difficult to keep this information consistent with specific productions. If subjects were listed as principal or secondary artists in the *Annals of the Metropolitan Opera (1989)*, they are listed consistently as artists in the catalogue, despite the fact that they may have been working as a chorus member in a given image. Spelling of names was verified in the *Annals* and through the Archives of the Metropolitan Opera. The subjects in the Negatives and Color Transparencies were completely unidentified, and any listed information is hypothetical. The negatives had no positives; however some prints do exist in the Regular Iconography File, neither credited to Schumer nor linked to the negatives. Those which have been identified are noted in the identifier field as "Print in Icon" (under subject) or "Print in Opera File" (under composer and production.)

Productions: those included are listed on the following pages, broken down by photographic medium. Negatives and Color Transparencies came in envelopes, identified by production only. In some cases a production had more than one envelope: these are identified as 1st envelope, 2nd envelope, etc. to distinguish possible different performances or versions of the same opera.

Locations (and occasionally dates) were specified on some original slide boxes, but since many slides seem to have been mixed together indiscriminately, readers are urged not to treat this information seriously. Any information noted on a box but not on a specific slide has been listed in parentheses. Unfortunately, many tour locations were not specified and are listed merely as "on tour." Locations and dates are unknown unless specifically notated. For the Negatives and Color Transparencies, since locations are primarily unknown, no "tour" entries exist in the index. Search under individual cities

SCHUMER COLLECTION

Dates are unknown unless specifically noted. Dates with months and years were taken from the developer's stamp on the cardboard of the slide and are marked with an *. (* = developer's date.) These dates refer to the printing dates, therefore the film may have been exposed earlier. Years specified with no month, and not in parentheses were marked on individual slides in Schumer's hand.

Identifiers describe non-artist subjects such as dancers, chorus, staff members, etc. Unverified individuals (that is to say subjects listed on slides but not found anywhere else) are listed with "[?]." There is a separate list of dancers in the appendix.

The index is in two-levels: each subject is sub-divided by opera, and each production is sub-divided by subject. The slide, transparency and negative finding aids are continuously paginated, and the index serves all three sections. This index follows computer filing rules rather than NYPL rules; note especially that umlauts are disregarded, and that filing is by word (and even by letter in the case of D' or L' names.) Unidentified artists are broken down by gender. "Unidentified" alone refers to a group of more than 2 of mixed gender. Dancers and supernumeraries are not categorized by gender. The "sight-seeing" index follows the subject and production index and includes locations only.

Operas represented by slides:

Aïda. Giuseppe Verdi
Alceste. Christoph Willibald Gluck
L'Amore dei tre Rè. Italo Montemezzi
Andrea Chénier. Umberto Giordano
Arabella. Richard Strauss
Un Ballo in maschera. Giuseppe Verdi
