

Appendix B. Index of Parnassus Vol.1-21

NOTE: This an index of the published issues of the journal not the contents of the records. It should be used to find where a manuscript by a given author may be in the collection. It is not an authoritative index, but was created in order facilitate the processing and use of the collection. Titles are often truncated. In some cases the subject(s) of an article follow(s) its title in parentheses. In most cases the index does not provide the title of creative works (i.e. poetry, fiction, art), but merely classifies them.
