

THE NEW YORK PUBLIC LIBRARY
RARE BOOKS AND MANUSCRIPTS DIVISION
ACCESSION SHEET

Accession # 38M102

Location: 4-h-2(L)

Title: Adelberg & Raymond. Records.

Approximate inclusive dates: 1858-1875

Date of receipt: June 22, 1938

Received from: Cadmus Book Shop
(purchase)

Volume on arrival: one package

Number of boxes (after reboxing): 1 flat box 0.3 l.f.

Condition: correspondence and reports in good condition

Restrictions: none

Description:

Biographical note: Dr. Justus Adelberg (b.(?) - 1869 (?)) was a metallurgist and an engineer. Together with Rossiter Worthington Raymond (1840-1918), he formed a mining and assaying partnership in New York City in 1864. Raymond went on to become highly prominent in the developing profession of mining engineering, serving as editor of the American Journal of Mining (1867-1890); United States Commissioner of Mining Statistics (1868-1876), and Secretary of the American Institute of Mining Engineering (1884-1911).

Scope and content: The records consist of business correspondence, geological and technical reports, and hand drawn maps from the period 1858 to 1875. The majority of the reports describe surveys in Canada, the United States, Mexico, and Cuba for gold, silver, coal, iron, clay, oil, lead, and copper. Others deal with mining operations. A few deal with smelting, roasting and metallurgical techniques. Some of the reports are in German. The items dated in the 1870s lack the specific firm name and are often signed by Raymond himself perhaps indicating the dissolution of the original firm with the death of Adelberg. There are also a few newspaper clippings, and personal letters. The collection is arranged alphabetically by state and country.

Special Formats: Photographs x Maps Audio Tapes Films
